Lab3

1, write a program, let user type in two integers(stored in int variable val1 and val2) and print out the maximum number and minimum number of them.

PS: the output should be complete:

eg: input: 1 2

output: the maximum number is 2

the minimum number is 1.

2, Write a program to judge whether an integer input is even or odd.

The output should be complete,   The output should look like this:

The value 4 is an even number
